SERVICES

ARRIVAL ONBOARDING AND COMPLIANCE SOLUTION COMPLIANCE SUITE

- 1. Core.** Main Compliance Suite module.
 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 2. Transaction Monitoring.**

Module for monitoring and checking financial transactions.

 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 3. User Behaviour Tracking.**

Tracks user's action performed in A.ID UI.

 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 4. Actions Audit.**

Collects all the business actions performed by the user.

 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)

ARRIVAL ONBOARDING AND COMPLIANCE SOLUTION COMPLIANCE SUITE

- 5. Stats.** Provides aggregation and calculation of various statistical data.
 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 6. Submissions.** Stores users applications for forms. Geo-distributed service.
 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 7. Checkups. Performs checkups for audit.**
 - a. PL: Ruby
 - b. DB: PostgreSQL (RDS)

ARRIVAL ONBOARDING AND COMPLIANCE SOLUTION PASSPORT

- 1. Passports.** Proxy service for accessing passports data.
 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 2. Passport Data.** Service for storing passports data.
 - a. PL: Ruby / GraphQL Ruby
 - b. DB: PostgreSQL (RDS)

SHARED

- 1. Auth.** SSO service with OAuth2 framework implementation.
 - a. PL: Golang
 - b. DB: PostgreSQL (RDS)
- 2. Identity.** Service for storing user's passwords.
 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 3. Documents.** Service for storing documents.

Supports publicly accessible and private documents.

 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 4. Notifications Sender.**

Sends notifications via email, sms, by robot calls etc.

 - a. PL/Framework: Ruby / Sinatra
 - b. DB: PostgreSQL (RDS)
- 5. 2FA-service.** Implements two-factor authentication.
 - a. PL: Golang
- 6. Link shortener (Shorty).** Shortifies links.
 - a. PL: Golang

PRIVACY & SECURITY

HOW WE MAINTAIN ARIVAL ONBOARDING AND COMPLIANCE SOLUTION DATA PRIVACY & SECURITY:

BACKEND

- Secure passwords storing (hash + salt)
- No passwords stored in publicly accessible services
- Mandatory Two-Factor Authentication
- User sensitive data stored in Geo-distributed services (dependent on user region).
- User sensitive data is encrypted in databases.
- Every service-to-service communication is encrypted.
- User is able to track who he shared his data with.
- Strong access granting and permissions model.

FRONTEND

- Default XSS Protection with Data Binding
- Dangerous URLs
- Rendering HTML
- Direct DOM Access
- Server-side Rendering
- Detecting Vulnerabilities in Dependencies
- Injecting JSON State
- Detecting Vulnerable Versions of React
- Configuring Security Linters
- Avoiding Dangerous Library Code

TECH STACK

BACKEND

1. PL/Frameworks:

- a. Ruby / Sinatra
- b. Golang
- c. JavaScript(TypeScript) / React

2. Infra:

- a. AWS
- b. K8S
- c. Docker

3. Storage:

- a. PostgreSQL (RDS)
- b. Redis

4. Storage: RabbitMQ

FRONTEND

1. Arival onboarding and compliance solution (CAS)

- a. JavaScript (TypeScript)
- b. ReactJS

2. Arival onboarding and compliance solution (Passport)

- a. JavaScript (TypeScript)
- b. ReactJS
